*Training day = 6 hours for ILT's after deducting lunch and breaks

Who is this Training For?

Candidates for this course may be the System Center Configuration Manager Administrator, Active Directory Administrator, Exchange Administrator, Windows Server Administrator, or Enterprise Desktop Administrator for their organizations.

Course Description:

This course is designed to provide students with detailed knowledge of the architecture, installation, configuration, and administration of InTrust and its integration into various source systems.

If you are taking this course to help your organization successfully setup logging tool, or if you're a consultant going for a refresher course, or becoming certified, this course will lead you down the path to success as your new knowledge will assist your company with an Intrust implementation.

Learning Objectives

Upon completion of this training, the student will be able to:
- Be proficient with design, installation, and administration of InTrust
- Have the ability to both install the product, and work within the environment
- Understand the differences between real-time collections and real-time monitoring
- Have the ability to work with both Windows and Linux log management

Prerequisites and Knowledge Base

- Windows Server
- Security
- Networking experience in an enterprise environment
- Basic Microsoft SQL Server
- Windows PowerShell knowledge
- Mobile device management
- Application configuration experience
