Student-Led Training (SLT)	Computer Based & Lab activities Including quizzes and tests	up to 6 days	Advanced

*Training day = 6 hours for ILT's after deducting lunch and breaks

Who is this Training For?

The primary audience for this training includes Active Directory Administrators, Exchange Administrators, and Windows Server Administrators.

The training is also relevant for Enterprise Desktop Administrators for their organizations.

Course Description:

Migrating from one SharePoint environment to another can be complicated and time-consuming. Metalogix Content Matrix for SharePoint is the industry's most powerful SharePoint solution. It enables the scalability organizations need to optimally configure the migration to suit their needs and project timelines.

This course is intended for those who will be planning and implementing the migration of SharePoint environments. Students will use Metalogix Content Matrix (SharePoint Edition) in their own virtual SharePoint environments by performing several common pre-migration, migration, and post-migration activities. . If you are taking this course to help your organization successfully migrate, or if you're consultant going for a refresher course, or becoming certified, this course will lead you down the path to success as your new knowledge will assist your company with minimizing IT resource loss, budget, and time.

Learning Objectives

Upon completion of this training, the student will be able to:

- Be proficient and self-reliant using Metalogix Content Matrix SharePoint Edition in the field
- Have a better understanding of related solutions and the problems they solve for you, such as the need for:
 - Pre-migration assessment
 - Ongoing SharePoint reporting
 - A proven methodology for performing the SharePoint migrations with little to no impact on Admin staff or business operations

Prerequisites and Knowledge Base

This course is designed for candidates having knowledge in, and understanding of, the following area:

- Client-server Technology
- Networking and TCP/IP communications
- SharePoint, Active Directory, and Exchange configurations
- Creating a SharePoint farm that is carefully planned and architected
- Be familiar with a SharePoint layout and know where to find the most used sites
- Working with PowerShell
- User Authentication in Windows (Claims-based authentication, Active Directory Federated Services)
- How to scale hardware configurations to achieve optimal performance
- Setting up SharePoint users in Exchange
- Basic understanding of SQL Server
- How to create an SQL user account
- Setting up proper roles in SQL
